

How to set up eAccounting in 5 minutes!

Last updated 2020-10-22

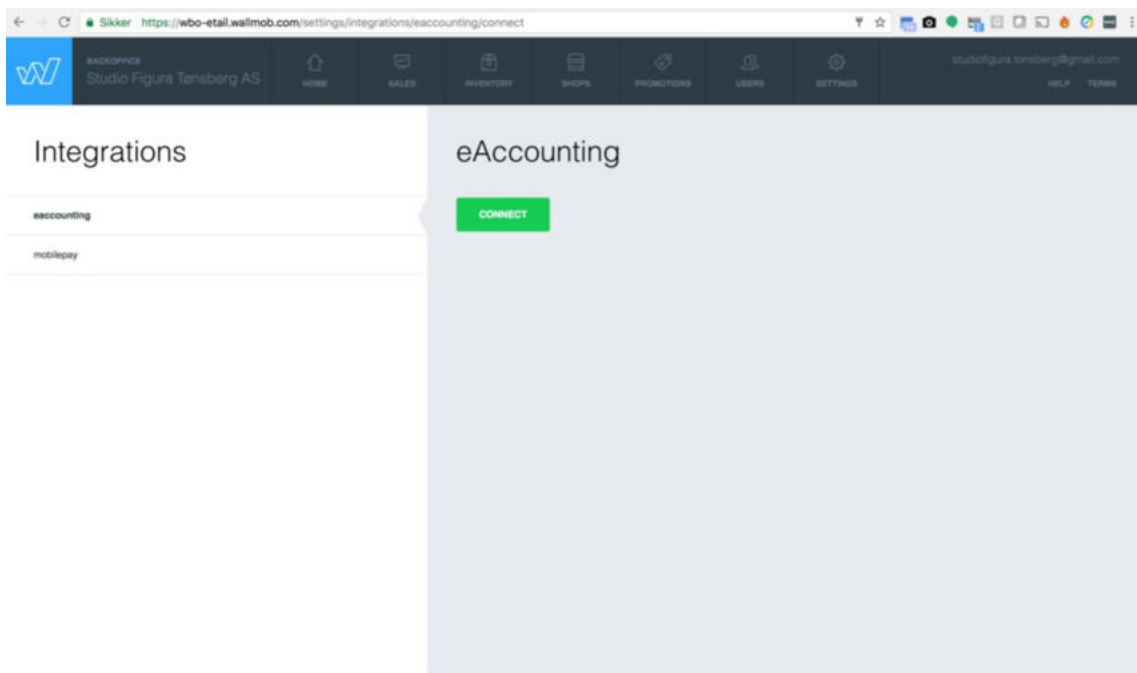

1. Open eAccounting and select Administration.

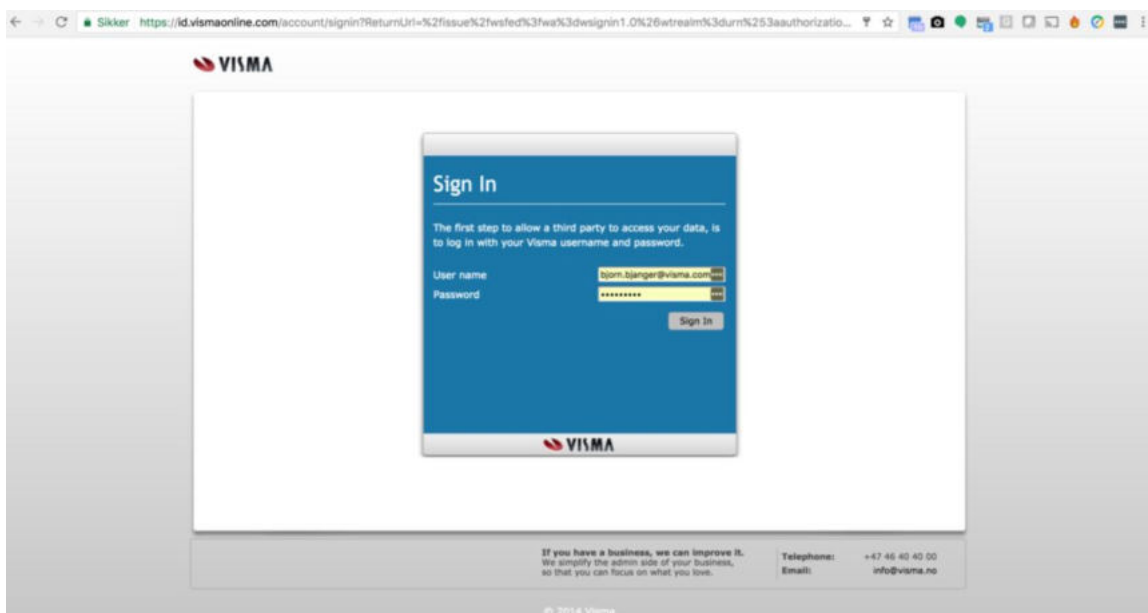

2. Enable (API) for integration.

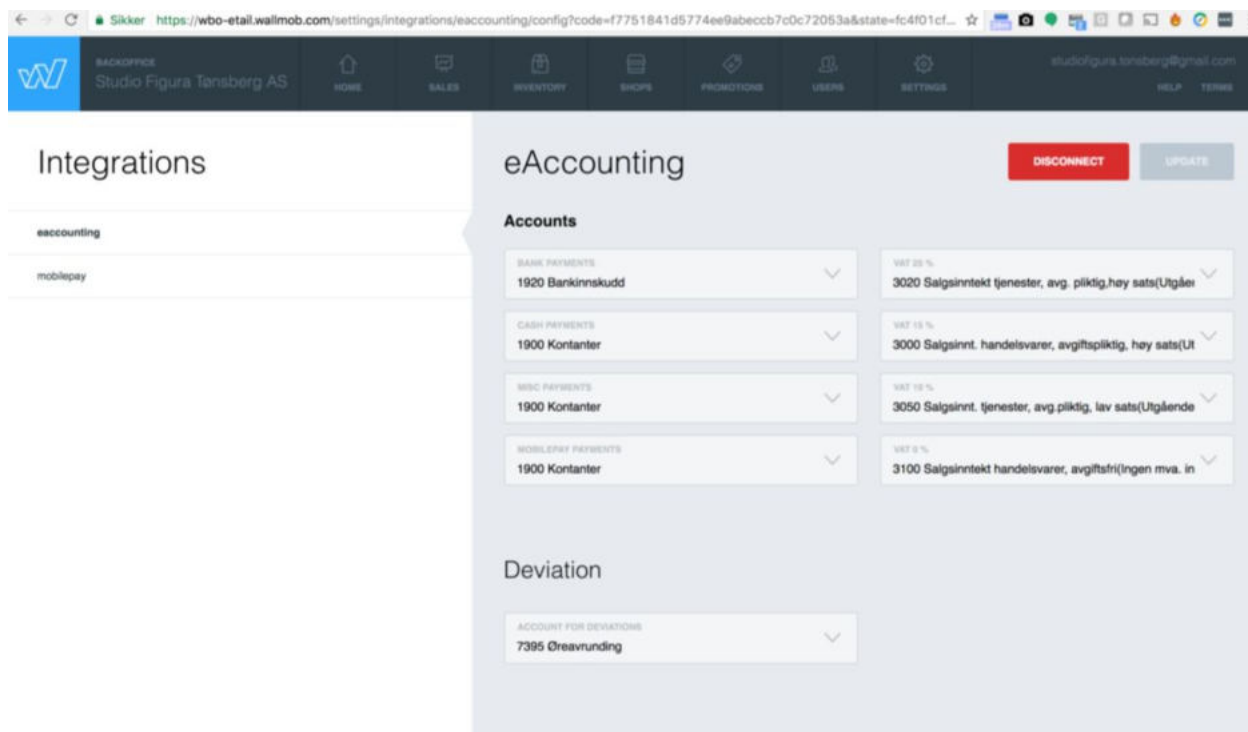

3. Log in to the Wallmob backoffice and select Setup - Integrations. Then select eAccounting and Connect.

4. Log in to eAccounting with your default eAccounting username and password.

5. You are now returning to Wallmob to set up the chart of accounts. Suggestions for the most commonly used plan are already there, but you can customize this yourself.

6. Save/Update. Congratulations! You now have control over the daily transfer of sales and VAT to your accounts.
