Terminals - connect@cloud

You can find it in POS Backoffice→ Settings → Terminals.

Also selected terminals will not be cleared after master user logout.

Just enter your username, password and tap refresh to select the terminal by it's id. Then select the terminal and tap "Save" button. When offline mode is enabled, terminal will no longer be connected to the POS and amount to pay should be entered manually to it.

The screenshot displays the 'Terminal' screen of the extendaGO application. On the left is a dark sidebar menu with icons and labels for KPI, STOCK, REPORTS, USERS, SETTINGS, USER, ACCOUNT, PRINTERS, TERMINAL (highlighted in green), MOBILEPAY, DINTERO, LANGUAGE, LOG OUT, and TODAY'S SALE (0,00). The main area has a light blue header with the 'GO' logo and a status bar at the top showing '16:39 04-08 Thu' and '100 %' battery. Below the header, the title 'Terminal' is followed by a status box 'Nets Cloud (Wi-Fi)' and a message 'Selected terminal: Nets Cloud (Connecting)'. A blue rectangular box highlights the login section, which includes three input fields: 'Username', 'Password', and 'Select terminal id' (with a right arrow icon), and a 'Refresh' button. Below this box is a large green 'Save' button. At the bottom of the main area are three buttons: 'Perform reconciliation', 'Reprint last receipt', and 'Enable offline mode'.
