

Extenda GO POS

Table set up

Last updated 2023-02-21

1. Enable parameter

For the relevant master user enable parameter:

```
Backoffice.Settings.Integrations.Elasticsearch.EnablePrivateIndexes
```

2. Setup integration

Go to back office integrations page, select ElasticSearch integration and Connect. You will get this message:

3. Receive confirmation e-mail

With login URL and credentials
