

Ordin Cloud Printing

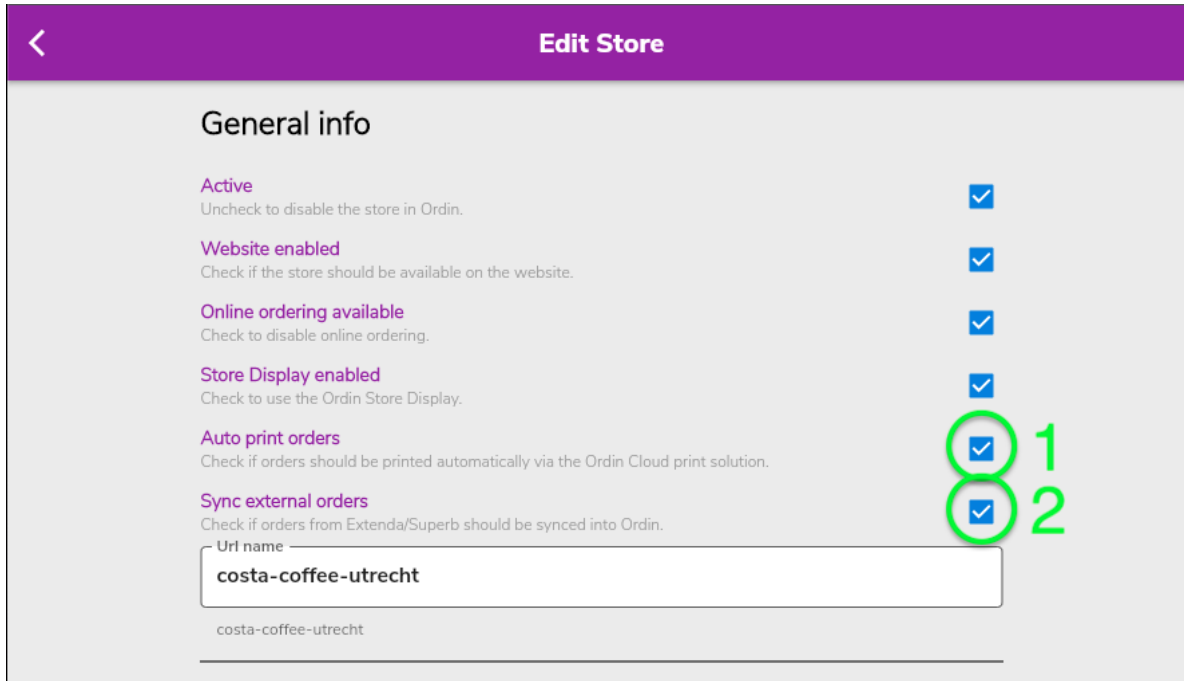

Print kitchen tickets without a KDS

Navigate to the organization screen to get started.

The screenshot shows the 'Organization Screen' for 'Komoku Cafe'. The sidebar on the left contains the following menu items: Visit web page, Edit Organization, Menu Settings, QR Code & URL Generator, **System Users** (circled in green with a '2'), Orders, Edit Layout & Delivery Area, Logs, Sync with Extenda/Superb, ADMIN - Product Settings, and Customers. The main area displays details for two stores: 'Buggegården' and 'COPENHAGEN'. For 'Buggegården', there are three numbered annotations: '1' points to the edit store icon (pencil), '2' points to the 'System Users' menu item, and '3' points to the cloud print icon (printer with a cloud). The 'COPENHAGEN' store details are also visible below.

1. Go to the edit store screen.
2. Create a Cloud Printing User
3. Get the cloud print url
4. Setup the Star Printer for cloud printing

1. Go to the edit store screen.

Edit Store

General info

Active
Uncheck to disable the store in Ordinal. ☒

Website enabled
Check if the store should be available on the website. ☒

Online ordering available
Check to disable online ordering. ☒

Store Display enabled
Check to use the Ordinal Store Display. ☒

Auto print orders
Check if orders should be printed automatically via the Ordinal Cloud print solution. ☒ 1

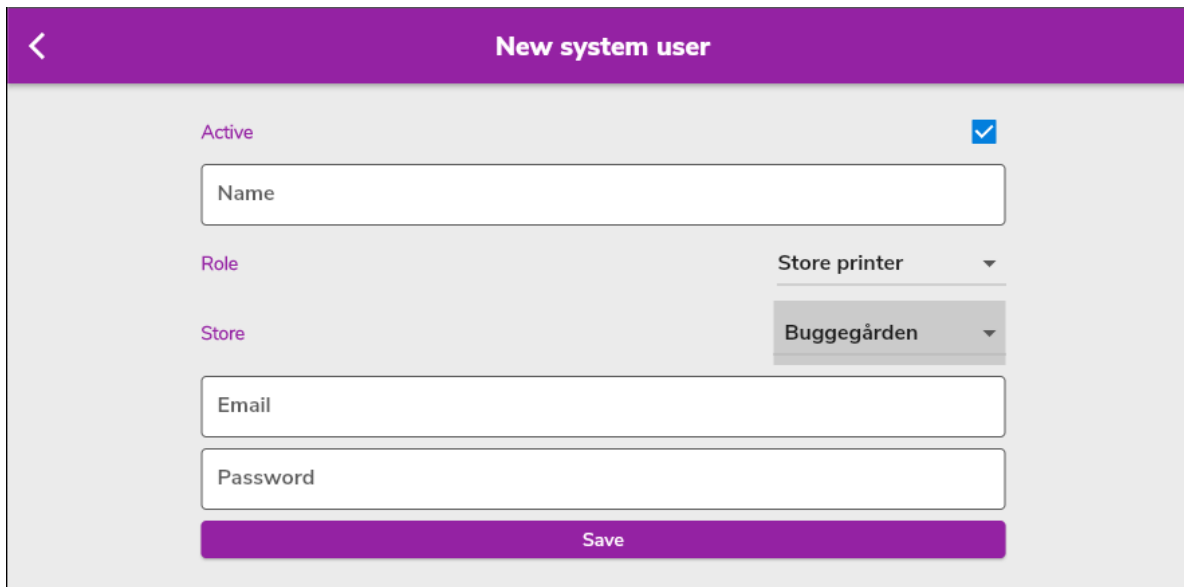

Sync external orders
Check if orders from Extenda/Superb should be synced into Ordinal. ☒ 2

Url name

costa-coffee-utrecht

Enable “Auto print orders” to use the Ordinal Cloud Print. By default only Ordinal orders will be printed. Check the “Sync external orders” to also print POS orders.

2. Create a Cloud Printing User

New system user

Active ☒

Name

Role Store printer

Store Buggesgården

Email

Password

Save

Navigate to the system users tab and click “+” to open up the “New system user” screen. Name the user appropriately, select the “Store printer” role, select the relevant store and enter an email and password. Remember these as they’ll be used at a later step.

3. Get the Cloud Print URL

Click on the printer icon on the store (3) to get the cloud print url.

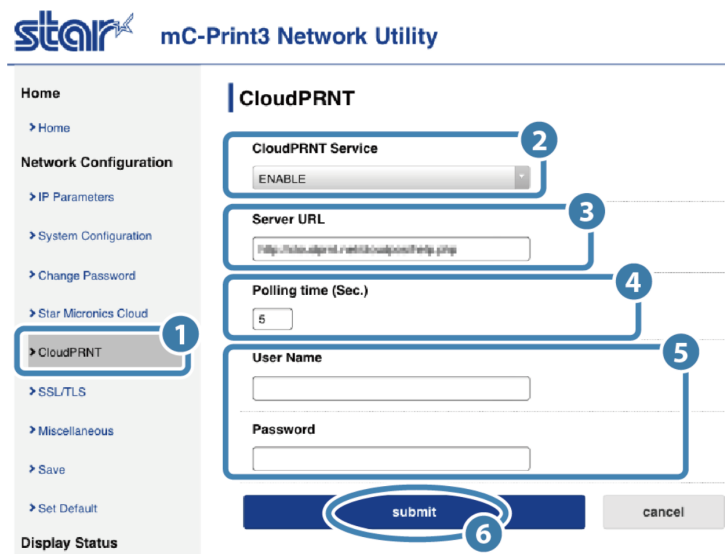

4. Setup the Star Printer for cloud printing

https://www.star-m.jp/products/s_print/mcprint3/manual/en/settings/settingsCloudPRNT.htm

Follow this guide to enable cloud printing for your Star printer.

2. Enable the CloudPRNT setting

- From the menu or the menu button (☰) displayed at upper left, open [CloudPRNT] ① and set CloudPRNT Service ② to "ENABLE".
- Enter the CloudPRNT server URL in Server URL ③.
- Enter the polling time in Polling time ④.
- Enter the user name and password in User Name and Password ⑤.
(Input is not necessary unless requested by the CloudPRNT server.)
- Tap [Submit] ⑥.

In step 3 of the Star Guide, enter the "Cloud Print URL" from the previous step.
In step 5, enter the email and password from the previous step.
