

Extenda GO POS Release Notes

Version 4.19 - expected release in app store 19.11.2025

Written by

Bjørn Willoch Bjanger, Product owner

Service pack releases to 4.18 POS

There were five service pack releases for 4.18:

- **V4.18.1:** Fix crash issue with Shared Bill when orderlineitemdiscount is applied. Add debug logs for ITOS
- **V4.18.2:** Move missing pusher messages from info to debug level. Fix missing order external attributes (not only related to loyalty points) when loyalty points are used
- **V4.18.3:** Gift card not appearing in backoffice. Review Diller coupons for correct sales channel. Go POS calculates order line item prices wrong when quantity increases in POS. Gift card value not added from shared bill
- **V4.18.4:** Certified implementation for Cashlogy cash management units from Azkoyen
- **V4.18.5:** Support for recurring promotions
- **V4.18.6?** Possible hotfix with improvements to changes management and customer prices handling relevant for master users with large amount of changes (release not decided at time of writing)

Contents in release

4.19

These are the major changes in Extenda GO POS version 4.19

This version covers work done in sprints 103, 104 and 105.

New features

- Fiskaly Sign AT has been implemented, the fiscal solution for Austria
- Fiskaly ES with Verifactu is now supported, for fiscal requirements in parts of Spain
- You can now pay using multiple gift cards in one bill. This also solves a request to top up gift cards with smaller amounts left. Now you can combine multiple into a larger payment
- Cap payments to order total
- Day tallies can now be reprinted from a list of day tallies in POS backoffice
- In a single order, and across orders when there is a known customer, POS now enforces that cash payments do not go above the configured threshold. For Norway, the threshold is 40 000 NOK. This is a legal requirement
- UI Change: Show list of contributing users under every product in cart
- Campaign discount CODE: warning if the code do not exist
- Loyalty points are now reduced for returned items
- Quantity can no longer be adjusted for gift cards in bill
- You can now assign reasons to cash movement events
- Order level discounts fixed for Svea payments
- When allowed by parameter and role privileges, product price can now be overridden in the order lines, to prices above the retail price defined for the product
- Customer phone number is printed on receipts when customer is present in bill
- Show discount per product line in addition to total discount summary
- When you are returning from an order, you will now see a list of transactions from the original order on payment page, and will be able to select which ones to refund to cover the returned products
- VerifonePSDK connectivity handling is rewritten to be more robust. PSDK has been updated to a new version
- You can now register customer name and mobile phone number for customers buying tickets, going into the ticket export to see who has bought tickets for a session
- On receipt should print SKU that was entered/scanned, for products with multiple skus/barcodes

- Disable split bill when return items exist

New parameters

- `POS.Setting.DailyCashLimitPerCustomer`, default empty. Stores a long number
- `POS.Setting.OverridePriceOnLineItem.Enabled`, default value false

Bugs fixed

The following fixes and improvements have been made.

- No print from KDS
- Voucher discount is not applied to line items when doing return
- Some orders are missing `register_sequence_number`
- Verifone p400 rejected error fixed
- Child categories are not visible in POS
- POS crash when doing logout
- Not possible to add discounts on product line level in GO POS on iPhones
- Split bill + campaign works incorrectly
- Addon selection works randomly
- Customer search in discount window works incorrectly

Complete issue list

Many of the issues registered as bugs are findings in functional testing and regression testing, so called QA bugs. Few of the bugs have actually been detected in production.

WM-5636	Fix KDS code after PrinterManager changes	POS 4.19	CLOSED	2
